RIGHTS OF THE PEOPLE.

In the third week of June, 1852, will be commenced, in the city of Washington, a Weekly Campaign Newspaper, under the above title.

It will be devoted to the maintenance of genuine republican principles as avowed and practised by the great WHIG PARTY of the United States; to the preservation of the NATIONAL Union, and of the Rights of the States and the RIGHTS OF THE PEOPLE under that Union; and in an especial manner to the election of GENERAL WINFIELD SCOTT, as the nominee of the Whig National Convention, to the Presidency of this Republic.

It will be the agreeable duty of the editor to dwell and to descant upon the merits of a man around whose brow are entwined the laurels gathered on many a victorious field. During the long period of forty years his talents, his valor, and his humanity have nobly illustrated his country's honor; and the patriotic masses, the toiling millions of our widely-extended country, will, on the seventh of November next, arise in their power and majesty to bestow their suffrages upon their honored fellow-citizen-the hero, the patriot, and sage-and to proclaim THE GRATITUDE OF A REPUBLIC!

TERMS:

THE RIGHTS OF THE PEOPLE will be published once a week-from the third week of June until the third week of November-at fifty cents.

Postmasters and others acting as voluntary agents, who may send five or more names, are authorized to reserve twenty-five per cent. for their trouble, or the advantage of this deduction may be shared by all the members of a club; and for each ten subscribers, on these terms, an eleventh copy will be also sent.

The notes of all specie-paying banks, gold, silver, and letter-stamps, will be received in payment. Address.

KRAUSER'S PATENT CLOVER-SEED HAR-KRAUSER'S PATENT CLOVER-SEED HARVESTER

IS BEFORE THE PUBLIC FOR THE FIRST TIME!
IT'S utility is beyond comparison with any other farming
I implement now in use. It takes the seed from the floid
leaving the straw or grass all standing. It weighs two hundred and fifty pounds, is drawn by one horse, and gathers
from ten to twelve acres per day. The fingers, or teeth,

throw them back into the box, which will cross a twentyacre field without emptying. The heads are then leaded
into a wagon and taken directly to the mill for cleaning,
thus diminishing the labor three-fourths, and saving all the
seed. This machine comes so low that every furner will
